VENTURE RANGE

1977 Snugpak® produce the first insulated vests.

1983 Sleeping bags first made on custom built automated machinery.

1987 Exclusive Softie® insulation is developed and launched as a viable alternative to down.

1988 Lead the way in pack size sleeping bags with the launch of the Softie® 3.

1992 First fully automated sleeping bag / jacket production line goes live.

1997 Snugpak® goes international launching across Europe, America and the Far East.

1980’s Force 7 all weather insulated jacket first promoted.

1990 Snugpak® help develop a synthetic fill diving under suit for Weezle Diving.

1995 Start to become a force in the military.

ABOUT US

We’ve come a long way since 1977 when our founder Brett Harris noticed a gap in the UK market for body warmers and taught himself to sew at his kitchen table so that he could create products to fill that gap. We’ve built on this experience and now we’re selling outdoor clothing and equipment around the world. Our products are found at the top of mountains and the bottom of oceans and everywhere in between.
Snugpak is unique. Generations of outdoor and military customers have come to rely on the Snugpak brand to provide them with dependable and effective kit. We’re one of the only companies that still manufactures sleeping bags and outdoor clothing in Europe. When you choose a Snugpak product, you can rely on its quality – every product is made to last and designed to work. Snugpak products are created for everyone, wherever they are, whatever adventure they are planning. Snugpak – with you for the journey.
TORRENT JACKET

SIZES XS TO XXXL

FEATURES
• 100% Waterproof with taped seams HH 10,000mm

The Snugpak® Venture Range is a series of new innovative windtops and synthetic insulation layers, designed to support a diverse range of outdoor activities.

Throughout the Venture Range designs, there are various Hook & Loop patches, designed to accommodate APALS® Personal Identification (PID) LEDs, or 3M Scotchlite™ Reflective Tabs to make you more visible in low-light conditions.

Small APALS® patches are located on the back of the collar, as well as the left sleeve. There is also a larger soft Hook & Loop patch on the right arm, for ID’s or Group Organisation Patches, allowing you to personalise your Venture Jacket.

Heavy duty, closely constructed outer fabric. Paratex Micro is exceptionally hard wearing but still remains soft to the touch.
For the entire Snugpak® Venture Range, the hood has been removed, allowing greater compatibility with other items of clothing, but the storage space remains. This allows you to roll up items such as a neck scarf, Buff®, fleece liner gloves or skull cap and store them close to hand.

The All Purpose Adhesive Light Strips (APALS®) are a battery powered light source. When in use can be seen up to half a mile away, handy for running in dim lighting.

The Venture Range includes a multifunctional pocket design exclusive to Snugpak®. Used for storage of a full size (large) map case, such as the SILVA® Carry Dry Map Case (265x480mm), or an iPad® mini™ within a waterproof eCase® (185x238mm). The main pocket also incorporates two D-rings to secure essential items, such as a compass or whistle, to prevent accidental loss.

The Venture Windtop and TS1 Jacket can also be folded into the pocket making it easy to pack and carry with you.

Soft Hook & Loop is also available on the front of the small outer-pouch, for either an APALS® LED or reflective marker.

The Basecamp Range is an ideal introduction to Snugpak’s range of sleeping bags. These chunky, warm and comfortable bags are made to the same exacting standards as the rest of the ranges, with an Isofibre filling that provides considerable warmth.

Highly siliconised synthetic fibres give a soft touch and prolonged lifespan compared to traditional fibre filled products.

**NAUTILUS**

Basecamp sleeping bags (not including the Nautilus and Navigator) are designed in a mummy shape, great to help retain body heat. Perfect for enjoying general camping and when using a car to carry kit around.

The inner lining of the Basecamp range is ‘Supersoft’ A silky smooth fabric specially woven to produce a highly durable and comfortable wicking breathable lining.

The Nautilus and Navigator can also be opened to make a square quilt.

The Softie® Expansion sleeping bag has a unique expanding system called the EEP (Elasticated Expander Panel), this allows the user the option to make the bag wider when required. You can do this to give yourself more room to move or to help cool the bag allowing you to regulate your body heat for a more comfortable night’s sleep.

Chisel shaped foot for extra comfort

Thermal Suede Snug Foot lining for warmth only available in 3, 4 & 5

Clips can be used to shorten the sleeping bag
### Softie® Expansion

SLEEPING MATS AND PILLOWS

ANTARCTIC MAT

The Antarctic mat is insulated unlike regular mats with sleeping bag insulation. This means that in very cold weather, self-inflating, rubber-based mats can crack when rolled, valves freeze, rendering them useless.

Introducing the new 40 litre compression drisak. A heavy duty, waterproof, storage bag with a roll and clip seal.

- 100% waterproof
- Durable & lightweight
- Roll-top waterproof closure
- Durable buckle secures roll top
- D-Rings for securing if necessary

Available in:

- Black
- Olive
**DRISAK WITH AIR VALVE**

**DIRECTIONS FOR USE**

1. Place items into the bag. Ensure the valve is open and press down to squeeze the majority of the air out.
2. Bring the top opening seals together and fold over.
3. Fold over 3-5 times.
4. Clip the buckles together to create a tight seal.
5. Further compression can be achieved by applying downward pressure. To ensure the contents do not block the valve opening, it may be necessary to push inwards with your finger.
6. Close the valve, the dry bag is now sealed.

TROPICAL HAMMOCK

JUNGLE HAMMOCK WITH MOSQUITO NET

ALL IN ONE INSULATION SYSTEM
Hammock Cocoon

This insulating layer fully encases the hammock (rather like a giant banana skin) trapping warm air within the hammock. The full length zip allows easy access in and out of your cocoon and hammock.
**TENTS**

**The Journey Solo** is a lightweight durable single person bivvi tent. It’s waterproof fly can be easily removed to allow the full mosquito net inner to be used on its own on dry warm nights for a cooler nights sleep and a view of the stars. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

**AVAILABLE IN**

**SUNBURST ORANGE**

**The Journey Duo** is a practical two person tent with a low profile design, excellent in high winds, with ample storage in it’s generous front porch. Large front door with mosquito net ventilation panel. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

**AVAILABLE IN**

**SUNBURST ORANGE**

**The Journey Trio** is a compact and practical three person tent, the extended porch and dome design creates a roomy interior. Ideal for back-packing and extended ventures. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

**AVAILABLE IN**

**SUNBURST ORANGE**

**The Journey Quad** is a generous sleeping area for four persons with extended living compartment for storing your camping necessities. The Quad is also a “Fly First” pitch type tent. This means you erect the Fly first as the main structure, and then the inner tent attaches from inside to the fly. Just as suited to weekend breaks as longer trips. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

**AVAILABLE IN**

**SUNBURST ORANGE**
JOURNEY DUO
THE JOURNEY DUO IS A PRACTICAL TWO PERSON TENT WITH A LOW PROFILE DESIGN.

1 PERSON
